Student Quick Start Guide for eLearning

Zoom

Zoom is the official online classes software at the University of Macau (UM) and UM's teachers are strongly recommended to use Zoom to host online classes. If this is your first time using Zoom for online classes at UM, please follow the steps in this link to complete your registration.

Tips of using Zoom

- Pre-testing your equipment and network connection
  Please make sure that your equipment (e.g. speaker, microphone, etc.) can be used for Zoom online class. You may join a test Zoom meeting here to test your environment.

  If possible, the wired connection is recommended because it is more stable. 5Mbps download and upload speed is recommended for the best experience on Zoom online class. You can test your speed here. Then, you may choose your connection (wired or wireless) depends on your preferences, environment and testing result.

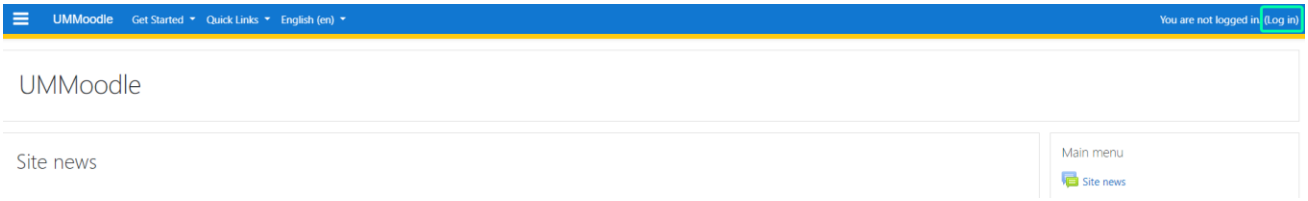
- Temporarily deactivate unnecessary applications
  While the meeting is in progress, temporarily disable non relevant programs on your computer that would consume network resources such as operating system updates, network backups, upload or download tasks, software updates, and so on.

- Improve audio quality
  Please refer to this article for recommendations on ways to improve your audio quality.

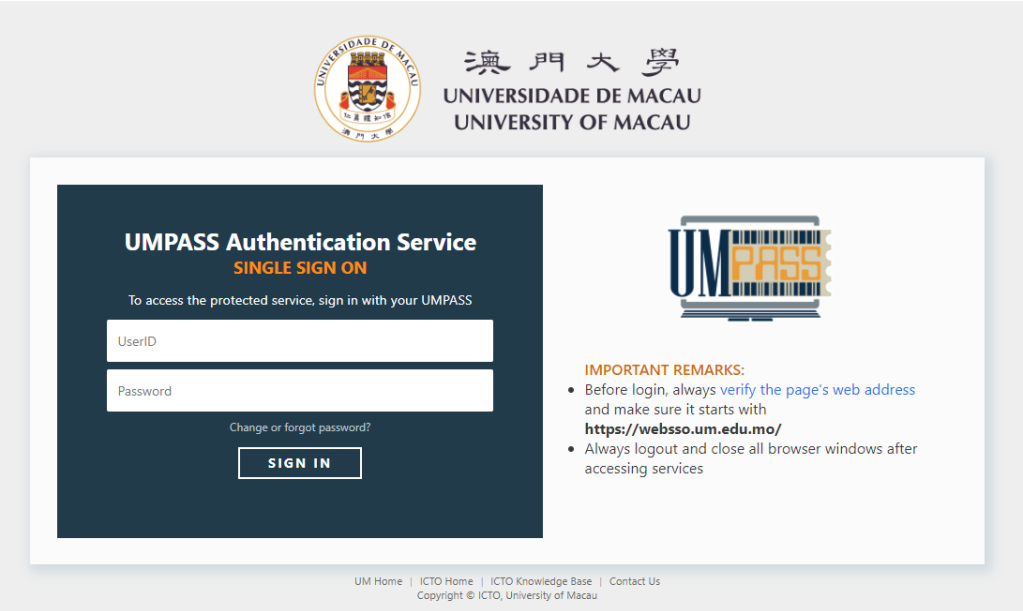
Log in to UMMoodle to join Online Classes

UMMoodle is the official eLearning platform at UM and students need to log in to use.

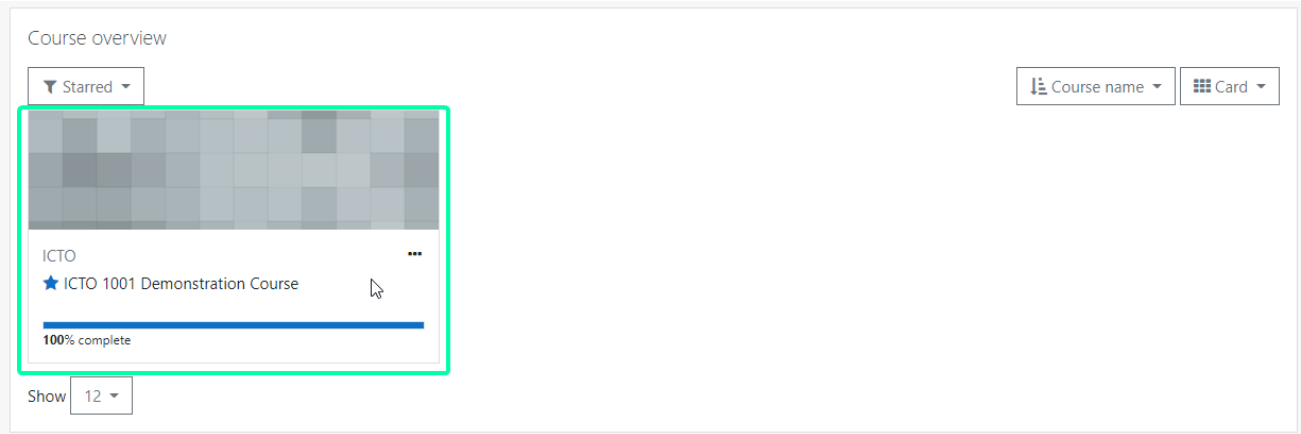
1. After visit UMMoodle, press "Log in" on the top right corner to log in to UMMoodle.



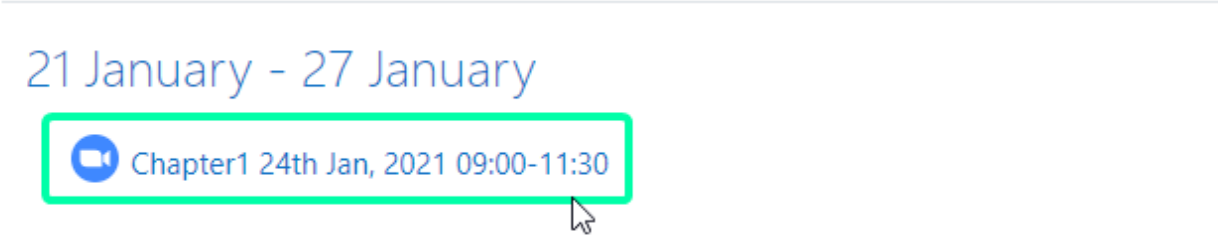
2. Please sign in with your UMPass account in the login window.



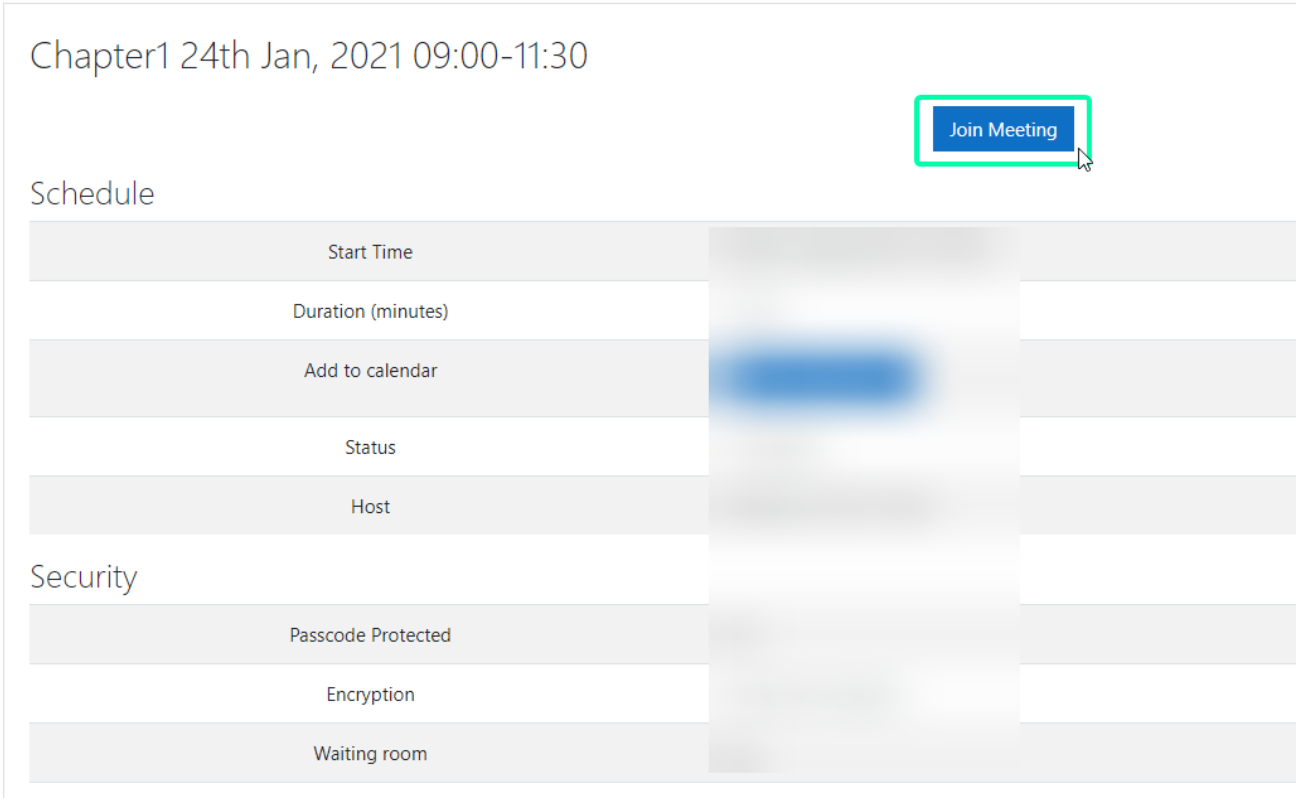
3. To join a Zoom online class, students need to first enter the course through the course dashboard on UMMoodle. Click on the course block to enter the course.



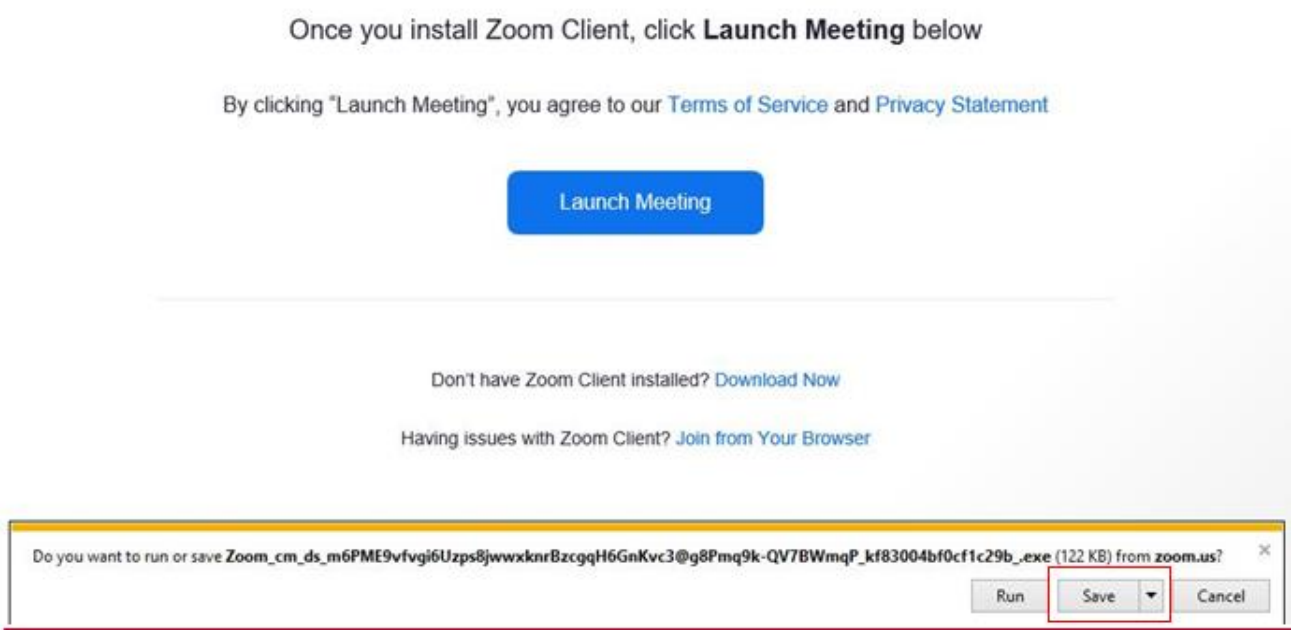
4. Scroll through the course sections to find the correct Zoom online class to join. Click on the Zoom activity.



5. Next click “Join Meeting” to join the online class.

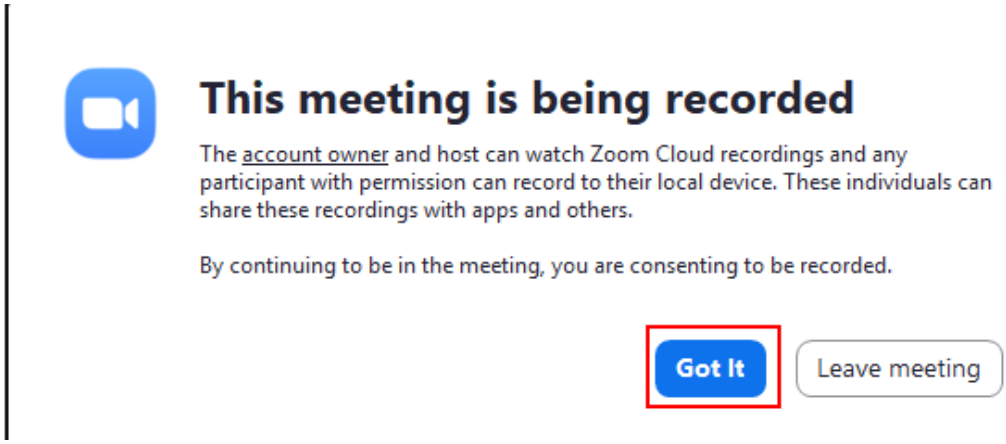


6. If you have not installed Zoom on your computer, it will prompt up an installation file for you to download and install. Please click “Save” to download the Zoom installation file.

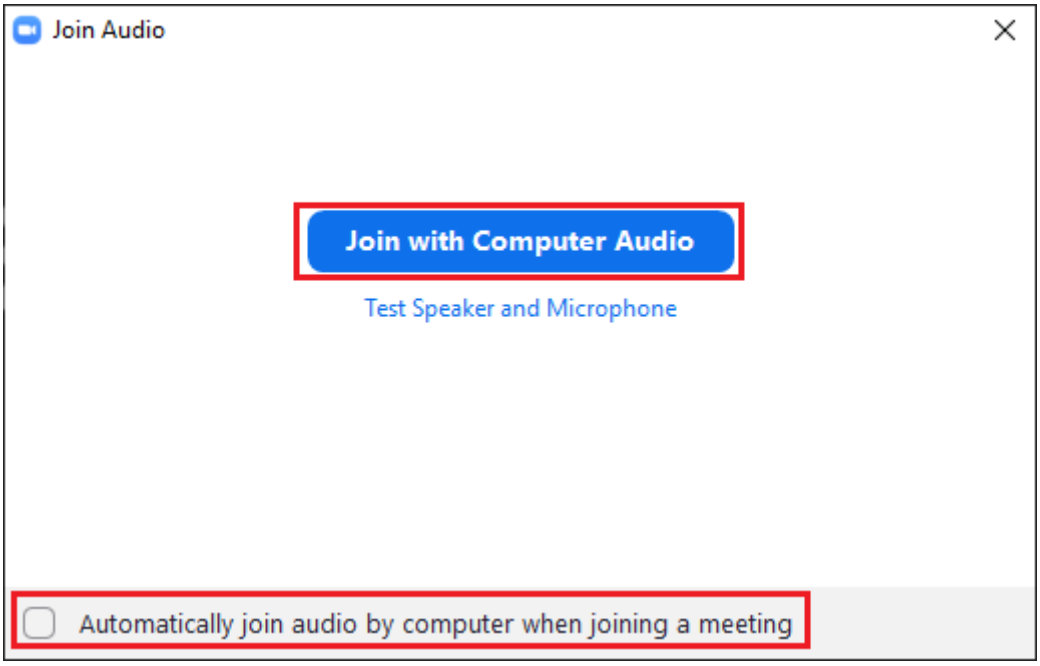


After installation, Zoom will be started.

7. Please read the notification as the meeting will be recorded. Select "Got It" to enter.



Click "Join with Computer Audio" to listen the audio. You may click "Automatically join audio by computer when joining a meeting" to avoid clicking this option again in future.



8. Finally, you will be put in the waiting room and please wait for your teacher to accept you to join the online class.
